

Oversight Subcommittee after I became Ranking Member in 2011.

Because of the wide-ranging oversight jurisdiction of the Committee, Dr. Pearson has been involved in investigating multiple federal agencies, from the Department of Energy to the Department of Homeland Security, Environmental Protection Agency, National Oceanic and Atmospheric Administration, National Science Foundation, and the National Aeronautics and Space Administration, covering a broad array of science and technology issues. He leaves behind a legacy of helping to reign in waste, fraud, abuse and mismanagement throughout the federal government dating back to the Science Committee's investigation of environmental crimes at the Rocky Flats nuclear weapons plant.

Dr. Pearson's oversight efforts have helped to uncover mismanagement of federal resources, projects and programs. He helped to re-open a network of key EPA regional libraries that had been inexplicably closed. He investigated the Veterans Administration's inappropriate destruction of an irreplaceable collection of biological samples, including the legionella bacteria that causes Legionnaires disease. He managed an investigation into an important Department of Homeland Security (DHS) laboratory called the Environmental Measurements Laboratory (EML) that revealed the DHS Science & Technology Directorate had intended to close this crucial lab without informing Congress. Dr. Pearson's efforts resulted in saving this lab from closure. His oversight efforts also resulted in the withdrawal of federal funding from a technically troubled and poorly managed aerospace project called the DP-2. His investigation of the mishandling of a critical radioactive isotope, Helium-3, used for the identification and detection of dangerous radioactive material, helped put management of that program back on track.

Dr. Pearson's oversight work on scientific integrity and public health resulted in several investigations of the Centers for Disease Control and Prevention (CDC) including its sister agency the Agency for Toxic Substances and Disease Registry (ATSDR). These investigations led to the public disclosure of a flawed public health report on the potentially toxic levels of formaldehyde in trailers provided to survivors of Hurricane Katrina and Rita by the Federal Emergency Management Agency (FEMA) and a flawed CDC report on the levels of lead-in-water in Washington, D.C. In that instance, the Committee's investigation prompted an internal CDC investigation of its Childhood Lead Poisoning Prevention Branch and the agency issued two separate formal notifications correcting its public health study.

In his investigatory and oversight role, Dr. Pearson has been a tireless advocate for people who would otherwise have been left behind by the government. There is no better example of this determination than the work Dan did on behalf of the families of Marines at Camp Lejeune, who we came to learn became sick because of a polluted water supply. It was the kind of staff work that should be admired and copied.

Dr. Pearson has always believed strongly in the institutional oversight authority vested in Congress and the need to investigate alleged wrongdoing by those tasked with overseeing federal agencies. His nonpartisan oversight efforts in this regard contributed to the removal

of three federal Inspector Generals (IGs) from office over the years, one at the National Aeronautics and Space Administration (NASA) and two at the Department of Commerce.

Throughout all of these investigations and oversight activities, Dr. Pearson demonstrated the patience and endurance to keep after wrongdoers in the federal government for months and even years if necessary. Doing investigatory work for a House committee can be thankless task at times, but Dr. Pearson was always willing to do what was necessary to carry out his oversight responsibilities.

In sum, Dr. Pearson has been a critically important member of the Committee staff. He has been passionate about the issues he has worked on, committed to excellence, and a thoughtful mentor to new staff members. I will miss him and dedicated service to the Committee. At the same time, Congress's loss will be his family's gain, and I know that his wife Neddie and his daughter Nora are looking forward to their time together with him in Oregon.

I want to thank him for his selfless professionalism and wish him all the best for the next phase of his life.

RECOGNIZING COUNCILMAN SCOTT KINCAID FOR OVER THIRTY YEARS OF PUBLIC SERVICE

HON. DANIEL T. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 9, 2015

Mr. KILDEE. Mr. Speaker, I ask the United States House of Representatives to join me in recognizing Flint City Councilman Scott Kincaid for his commitment to the city and for the years he has served as a public servant.

Born in Flint, MI in 1952, Councilman Kincaid has been committed to his hometown most of his life. In 1970, he graduated from Flint Southwestern. After graduation, Councilman Kincaid's strong sense of civic duty led him to serve in the United States Army.

Following his time in the service, Councilman Kincaid worked for GM Fisher and was heavily involved with the UAW. He served on the Executive Board, was the Education Director, and was appointed the Joint Activity Representative for Local 581. By 2003, he was working as the Government Liaison to assist with new plant investments. He is currently the Health Initiatives Coordinator for Region 1C Flint.

In 1985, Councilman Kincaid was first elected to the Flint City Council. He has from that day forward served the City of Flint to the best of his abilities. Councilman Kincaid served as Council President more than once over his tenure with the city.

Mr. Speaker, I applaud the work and commitment of Councilman Kincaid. It is the dedication of people like him that keeps this city strong.

COMMEMORATING THE RETIREMENT OF DR. WILLIAM E. "BRIT" KIRWAN

HON. JOHN P. SARBANES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 9, 2015

Mr. SARBANES. Mr. Speaker, I rise today to honor Dr. William "Brit" Kirwan, who has been a leader in the State of Maryland and in higher education for more than 50 years.

President John F. Kennedy once said, "Leadership and learning are indispensable to each other." Well, I can tell you that Dr. Kirwan's commitment to leadership and learning over these last 50 years have been indispensable not only to one another, but to higher education in Maryland and across the nation. Leading with integrity and purpose, Dr. Kirwan has earned the trust and respect of faculty, students and other leaders of higher education all over the country.

Throughout his career, Dr. Kirwan has been committed to something he has described as "constructive leadership"—which involves becoming a leader not through division and power, but through unity and service. He has embodied this philosophy at College Park, serving as chancellor of the University System of Maryland for more than 12 years, as president of the University of Maryland for 10 years and as a member of the University's faculty for 24 years.

Dr. Kirwan has also taken his service and expertise beyond College Park, chairing the National Research Council Board of Higher Education and co-chairing the Knight Commission on Intercollegiate Athletics. He also serves on the boards of more than five organizations—including the University of Maryland School of Medicine, Maryland Chamber of Commerce, Greater Baltimore Committee, Economic Alliance of Greater Baltimore and Maryland Business Roundtable for Education. And he belongs to more than four honorary and professional societies—including Phi Beta Kappa, Phi Kappa Phi, the American Mathematical Society and the Mathematical Association of America.

These efforts have not gone unnoticed. Dr. Kirwan is the recipient of one of the nation's highest honors in higher education—the TIAA-CREF Theodore M. Hesburgh Award for Leadership Excellence. His invaluable leadership and his commitment to higher education in our state have also been recognized by several Maryland-based government, academic and business organizations.

But perhaps the legacy of Dr. Kirwan's service over these last 50 years is best conveyed in his own words. In a speech delivered to Phi Beta Kappa inductees in 2004, Dr. Kirwan said, "Our nation is in dire need of a new generation of enlightened leadership . . . highly educated, wise leaders who have respect for the individual, for inclusiveness, integrity and the common good." He continued, ". . . our nation and world face a distressing array of enormous challenges, which—without enlightened leadership—will only worsen in the coming years."

If the next generation embodies Dr. Kirwan's commitment to service and enlightened leadership, I am confident that it will successfully take on the world's complex challenges.
